

No	Question	Answer
1	following options are interpreter or compiler - javac, jvm, javadoc	all are interpreter
2	Pragma is a compiler director used to find oracle error number.	pragma exception_init
3	which testing model which checks for validation and verification ? 1) system testing 2) v model 3) waterfall model	v model
4	Access to oracle forms customization and personalization is controlled by which profile option 1) user invoice batch control 2) hide diagnostic menu entry /utilities : diagnostics 3) menu enters 4) operating unit	hide diagnostic menu entry /utilities : diagnostics
5	AIM stands for?	Application implementation methodology
6	product_name varchar2(20) how to declare the above variable which is of type column of a table	product.product_name%type (don't choose the option rowtype)
7	a) alpha testing is done at b) beta testing is done at	a) developer side b) client side
8	company ABC added a new responsibility to e-business suite, system administrator sets MO Operating unit option at application developer. Application level will override _____ level	Site level
9	what are the 3 routines / procedures of custom.pll	a) zoom_available b) event c) style
10	where custom.pll is located	\$AU_TOP/resources
11	create sequence or_seq (a sequence is created) select or_seq.nextval() from dual what is the output	it always gives 1
12	what is user profile in oracle forms	a set of changeable options that effects the way your application runs
13	which are the responsibilities available in e business suite	system administrator and application developer
14	who are the stack holders of erp project	a) vendors b) implementors c) system integrators
15	choose the right option for independent value set	a value set provides predefined list of values
16	how does a tab canvas display	it displays as tab page on the top of content canvas
17	how does a stack canvas display	on the top of content canvas of the window
18	identify the 3 element involved in submitting a concurrent request	1) selecting concurrent request/ request set 2) defining a solution schedule 3) providing conclusion options
19	if you want to register a custom table In oracle application , what package do you use	AD_DD.register_tables

20	set of books have been replaced with which module (General ledger module) a) category book b) category set c) ledger d) analyst book	ledger
21	how do you sort while writing a select statement in data model	add order by group
22	procedure with in and out parameters . Default is IN -> you can pass values	INOUT is used to pass and get values
23	what r two different types of applications that can be accessed from oracle home page	form based application, self based application
24	list minimum requirement to access oracle e business suite	web browser and internet connection
25	what are the 2 different type of report column	none of the above
26	message attribute must be associated with _____	messages
27	canvas available for get canvas and set canvas _____	get_view property , set_view property
28	OUM stands for	Oracle Unified Methodology
29	how to insert records statements into a table	interactively, using &, use codes for character insertion
30	select * from employee where hiredate < (select hiredate from employee where empnum = 005)	fetches all the employees hired before empnum = 005
31	select empnum, ename, deptno,dname from emp e join department d on e.empnum = d.empnum a) equijoin b) self join c) non equi join d)outer join	equijoin
32	header iformation of the sales order entered in order management is stored in which table ?	OE_ORDER_HEADERS_ALL
33	Template.fmb is stored in	\$APPL_TOP
34	highest top in oracle application	\$APPL_TOP
35	to create a user profile option	application developer -> responsibilty profile
36	count of employees working on each department	select deptid, count(empid) from emp group by deptid
37	command use to display the device name of the terminal	tty
38	What do you required to group radio button?	Record group
39	LOV to return a value, which object will we use 1. Record Group 2. Text Item 3. View 4.Control Block	Text Item

40	According to coding standards diff procedures are there..... MULTIPLE 1.Item-Handler 2.Block Handler 3.Record Handler 4. Table Handler 5. Event Handler	Item Handler Table Handler Event Handler
41	What are the different components in descriptive flexfields?	Global segment Context field segment context sensitive segment
42	Types of Operators MULTIPLE 1. Arithmetic operator 2. Logical operator 3. Relative operator 4. Bitwise Operator 5. Null operator	Arithmetic operator Logical operator Relative operator Bitwise Operator
43	Types of variables 1. Global variable 2. Static variable 3. Local variable 4. Domain variable	Global variable Static variable Local variable
44	What are the three transaction classes used in oracle receivables	Invoice Credit memo Debit memo
45	What are the two index based objects in check boxes?	Checked Unchecked
46	What is organised structure?	
47	What is configuration management ?	It provides an organized structure for handling project document
48	What is capgemini quality and Management Policy	To Always meet or exceed client expectations
49	What is Regression Testing	Testing of software after modification has been made to ensure reliability and software release
50	What is mandatory setting done by an oracle app custom dev form and to generate a form	FORM_PATH/FORM60_PATH
51	What will be output of the following \$echo "\$\$\$\$"	pid pid
52	Select max(sal) from emp where sal not in(select maxSal)	Return second highest sal
53	Matrix group by	row columns& cells
54	which cmd searches string in file opened in vi editors	/: forward search ?: backward search

55	which form built in are allowed to switch between the forms and work	Open form
56	Which is right command to create directory structure project/requirement/client	mkdir project project/requirement/client
57	Which property pallette would you alter to specify a different value for id_parameter on parameter form	User parameter
58	Which statement is true about cursor?	Implicit cursor is named as SQL
59	Which predefined exception would be appropriate to handle trying to fetch a row	no data found
60	Which property would you set to control item as to access criteria	Query allowed
61	Which setting change would you allow to make the child object to move out of parent object	confined mode off
62	Which statement are true about workflow	It provides a routine info about specific E-business process
63	Which two triggers fire before data is retrieved by a query	Before and After Parameter form
64	Why do you want to create a control block in a form module	To place a various control blocks on a single block that is not related to a table in database
65	_____ is a process of executing a program with intent of finding errors	Testing
66	_____ cursor advances to the next row in the active set each time the fetch command is executed	iterative
67	the type of query that is created within a where or having clause is called _____	sub query
68	how to add not null constraint to the table column	alter table table_name modify column varchar(200) not null
69	exceptions are declared in ___sec, raised in ___section and handled in _____ section	declare , executable, exception
70	number exception can be numbered between range	(-20000 to 20999) - According to sir (-20000 to -20999) - According to pdf
71	select empnum , sal from emp e where sal > (select avg(sal) from emp where deptno = e.deptno)	this sql query is an example of correlated sub query using single row comparison operator
72	select empno , ename from emp where sal = (select max(sal) from emp order by sal)	runtime error
73	in which situation we use outer join query	the emp table column corresponds to region table column that contains null values for rows that need to be displayed
74	pl sql exceptions messages consist of a) type of exceptions b) the error code c) message d) all of these	all of these
75	while creating procedure local variable is placed after which keyword	is

76	select length(ltrim(rtrim(ename))) from emp	it applies rtrim then ltrim and then applies length on the ename column
77	examine the code cd	it switches to home directory
78	in vi editor forward search is done using which command	/ tat
79	the second set of 3 permissions r-- in unix command indicat that	group has read permission only
80	the % key allows user to do ??	move cursor to matching delimiter, when a delimiter is parenthesis or braces or bracket
81	string is java is a	class
82	What is numerical range of 'char'	0-65535
83	What is the output as java main_arg	123
84	Which of the following are legal lines of java code	All of these
85	In oracle reports, trigger fires only after _____ is validated	Query
86	Oracle reports produces _____ extension	.rdf and .rep
87	Each page 12 records which property will help(scenario)	Max record per page
88	The _____ triggers are PL/SQL functions that are executed when parameters having specified on command line	Validation triggers
89	The _____ are PL/SQL program unit that fires at specific time during report execution	triggers
90	under the print object, on property the _____ property value print all logical pages of parent	all pages
91	Which report style would you use to create a report using each dept	group above
92	Pair prog is done in which review is Software Engineering	OPTION 2 & 3
93	Restricted package procedure is built in procedure that cause _____ to take place	Navigation
94	The _____ built in retrieves the id of form	FIND_FORM
95	The _____ property of canvas besides the window in which the canvas displays in runtime	Windows
96	The form built in which assigns value to item whose name is stored in an item from a block	copy&name_IN
97	The form built in which does not help us to assign value to item whose name is stored in an item from a block	copy and no copy
98	What is GET_BLOCK_PROPERTY in oracle form	Forms built in to retieve locks property
99	When the user selects the value in LOV , the value is assigned to _____ to which it is assigned to oracle forms	Item
100	which built in allows you to dynamically show alert msg????	SET_ALERT_PROPERTY

101	Which built in is used to link form modules in an application allowing to work users concurrently	OPEN_FORM
102	Which built in you used to test whether create command used successfully	FORMS_SUCCESS
103	Match the following 1. Tech Analyst 2.Sys Admin 3. Application specialist	1-c 2-a 3-b
104	SGA stands for	SYSTEM GLOBAL AREA
105	The _____ is attached to responsibility	MENU
106	The ____ schema performs authentication of username,password&application	APPLSYSPUB
107	The presence of descriptive flexfields on a form is indicated by _____ field enclosed in _____	-,()
108	The presence of key flexfields in a form indicated by _____ field	LOV
109	A short name for execution concurrent program cannot exceed _____ char	100
110	Which of following methods is used to run a pick release	All of these
111	Full form of QMS	Quality management system
112	QMS is framework of _____ a) template b) procedure ,.....	all of them
113	which of the following is the service provided by oracle to customers who want any form of technical assistant	meta link
114	which testing involves testing of each possible input and every possible output	exhaustive testing
115	who performs unit testing	developers
116	the predefined exceptions ' too many rows' returns when _____	select into statement returns more than one row
117	correct syntax for creating view	create view view_name as (option 2)
118	select correct statement for update	option 5(saying option 1 and option 4)
119	choose the correct options - when if no data found in sql	when sql statement retrieves no record from table
120	pl sql raises exception into 2 conditions	a) when statement returns more than one row b) when statement returns 0 rows
121	select correct statement for sub query	option 5 ( it has options 1 and option 4)
122	types of joins are a) equi b) self c) outer d) all of these	all of them
123	which is not a type of plsql join	natural join
124	data types in pl sql are	option 1 , 2 ,4 (%type, %rowtype, boolean)
125	data dictionary used to store info about procedure is	user_procedures
126	what are 5 built in functions provided in sql	min, max, sum, avg, count
127	write a command to display 3rd month of year 1996	cal 3 1996

128	which is not a filter program	date
129	command head by default print how many lines	10
130	shell command	all of the above
131	class a .....(it is a prog beginning with class a)	compile error
132	what is the process of defining the method in sub class having same method name and type signature in super class method	method overriding
133	which package stores all simple datatype in java	lang
134	which is valid declarartion in interface declaration	public double method A()
135	which is reserved word in java programming lang	native
136	Which of the following statement is true	DATA_TOP: contains oracle application db files
137	which of these is called from events common to all oracle applications	custom
138	while registering oracle form the_____ field tells oracle app object library to find your form	application
139	select right option for purpose of sql loader	sql loader is oracle supplied utility that allows us to load data from dat(flat) file into 1 or more db table(read the option correctly)
140	if I have to allow dat file to store max 30 records we have to use	error 30
141	md50 md70 and md120 are part of aim document (true/false)	TRUE
142	the _____ are group of package procedure easier to develop maintain and debug	handlers
143	sql loader where loading sql records based on certain conditions using where clause -----	FALSE
144	oracle apps custom table should'nt have_____data type	long, long raw, raw
145	to dynamically control many items ____ procedure is used	app_special.enable
146	the _____ option enables us to deliver notification to others using oracle workflow as well as which printer and how many copies of output	completion
147	what is true about background engine in oracle workflow	1 and 5
148	in order management when we enter sales order _____column in _____table is entered	4 and 5 (4-flow_status--all , 5 - flow_status_code --all) (answer ending with all)
149	_____ form is used to open a new period in oracle recievables	open/close accounting period
150	ERP products selection should'nt depend on some parameter	4 and 5
151	the _____ model is adhoc and fire fighting approach and fix bugs easily	quick fix

152	what is configuration in SE	arrangement of functional units of system in a particular order
153	product testing is	black box testing
154	select which are quite a few logical operators in sql	AND, OR, NOT
155	what is the max number of else used in if clause	only 1
156	select 1 from emp	1 column displaying column heading as 1 and column value as 1
157	column for which we identify unique key for each value	primary key
158	we have a lib file that contains lib source code and compiled exec code is called _____	.cll
159	canvas which is base view and occupies whole window	content canvas
160	what is the common report style include	matrix and tabular option a and b
161	we use a column for performing computation on one or more column	formula column
162	what is the format of a file for opening a existing template modify its object as required	.tdf
163	what are options for template	predefined user-defined no template
164	if we use a wizard to modify a paper layout report what will happen	It will destroy the previous one and create a new one
165	how to select more than one column to interact to one new group	shift+click
166	what is true about data link	create relationship between group and query
167	list of values present a data contained within an object	Record group
168	Types of canvases stacked tabbed content	stacked tabbed content  I,iii,iv Ans option vi
169	Triggers associated with DML operation ON insert ON delete ON update	ON insert ON delete ON update  ii,iii,iv option option vi
170	A PLsql executed before an object is formatted is	B-->format & layout trigger C-->Validation trigger
171	which of these is used to build client server apps	form builder
172	types of list item	pop,combo,plist
173	Types of record group	non query rg,static request group,query rg

174	what are 3 types of user exit available oracle interface exit non oracle exit	all of the above
175	How many window of a form have console?	1
176	Different modes of window a. model window b. model less window	a. model window b. model less window option a and b
177	Process of obtaining & managing materials requirement for manufascturing is known as	procure to pay
178	_____ is available to users	\$CUST_TOP
179	Which of them gives snapshot of the organization at any time	Database
180	which package is used to open file	UTL_FILE.FOPEN()
181	Types of interfaces?	2
182	collection of chart of accounts and currency and calender is called _____	set of books
183	_____ Is the highest level in the organization structure	business group
184	_____ schema is used in oracle apps	apps
185	which responsibility is used to create a new user?	s/m administrator
186	which is not a phase of concurrent request	accept
187	it is true that multiple concurrent prog use same exec file to perform specific task	TRUE
188	which phase is running a request a) pending b) running c) completed d) not complete	a,b,c
189	the supply chain concept is originated from ?	marketing
190	not a key attribute of SCM?	customer power
191	distribuiton types records the amount of supplier charges to shipping	primary parent entity
192	if we do not specify this, GL import all journals	flexfield
193	_____ memo is raised if any return or ----- policy with regard to sales policy	credit memo
194	what are distribution requirement planning b) inventory manag.. C) distribution planning	option b and c
195	which level is just above the site level	application level
196	diff types of invoice validation - s/m, batch, online	all of the above
197	identify which func is not a core func of a org	product / service/ dev function
198	reason for project failure	schedule , budget , quality, scope
199	what does white box testing include ?	all of the above
200	what is process chart ?	is one that shows the ..... elements are- repair cost, warranty cost, dissatisfaction cost

201	Total quality management (TQM) emphasis on ?	commitment to quality that goes beyond internal company issues from supplier to customer
202	what is not a part of TQM program?	centralized decision making authority
203	choose the right option that describe the features of profile In ora apps	developers can define their own profile options
204	all the customized object related of german lang are under this category - us, german, D	D
205	source file of all oracle apps forms are stored in which directory	\$AU_TOP/forms
206	if we want user to enter any value as long as the value set meets the boundary condition and followed by any eg :-	none
207	begin fnd_profile.value(org_id) end; the above pl/sql retrieves the profile option value at _____ level	site
208	begin apps_custom.close_window(w_name) end;	closes
209	in the apps schema what is the type of synonym defined for all object of each product schema	public
210	oracle apps is 3 tier architecture consisting of 3 imp	op I, iii, iV
211	which of the following is network of facilities & distribution options that performs function of procurement of _____	supply
212	basic storage of java program	variable
213	if the programmer removes the static keyword from the prog. What will be the error?	prog compiles but runtime error
214	which class is super class of every class in java	object class
215	which built in copies record group from list_item	populate_list
216	instead_of_trigger	use when you are using a trigger
217	while developing a module we would like to display window visible , which command is used	show_window
218	single large record	to display we use tabbed canvas
219	3 values that are valid parameters for do_key built in	enter, exit_form, execute_query
220	begin set_block_property(:block_name,insert_allowed,property_false) end;	block insert property is changed to false and user cannot insert values
221	begin set_canvas_property(canvas 1, top_most_tab_page,t1) end;	t1 tab page will be alligned 1st page at runtime

222	begin set_item_property(:block item, visible, property_true) end;	the plsql block will handle error at runtime with message cannot enable item
223	begin t1_pkg_p1 end;	p1 procedure will not execute & result in runtime error
224	begin if:p_customer_id is NULL then :p_customer end if;	after parameter form trigger
225	select empno, ename from emp where empno = :p_empno choose the right parameter type	bind parameter
226	which of the right trigger in plsql when executed before object is formatted	format trigger
227	customization of form is done using	object navigator
228	choose the testing method and presence of error	recovery
229	which of the following method in SE in incremental module	incremental
230	what is the document that helps to prepare a conversion environment detailing built activities	CV.030
231	schedule payment are created is based on when invoice header information is saved is called	payment_terms
232	facility in R12 to enhance multi organization that allows user to enter transactions	multiple organization using single responsibility and multiple responsibility
233	what allows user to monitor virtual space and coordinate the routine the activities of the process	work flow engine
234	which of the following are the reasons for the reversal of recital AR	option 6( it contains option 3 and option 5)
235	direct = 'true' sql loader syntax	direct
236	in data file 100    k1 find the right format	variable format pipe separated
237	begin fnd_standard.set_who end	option 6( it contains option 3 and option 4 and option 5)
238	in forms personalization , when new item instance is selected what must you enter as component of a trigger	block_field_trigger
239	under form personalization, form built in which can be used when rule is associated with an action	go_block and go_key
240	choose the procedure under custom pack in custom.pll use to code specific business logic is based on event occurring in a form	event

241	what is the file where does sql loader writes data with error	bad files
242	cursor holds multiple rows but can process _____ row at a time	one
243	force view	view is created with compilation error
244	_____ is dml operation	insert
245	which clause is used to join tables when columns are different	on clause
246	to create a procedure in another schema , what privileges we need	priviledge
247	in multiple row sub query the greater than all returns greater than which set of values	greater, maximum
248	select add_months(last_date,-1,1) from dual	returns first date of the month
249	what is the program that provides service despite error or unexcepected condition	defensive
250	the probability of finding more defects in a module is proportional to	no. of defects already found
251	what are the basic steps to implement QMS	build, deploy, design
252	which is the basic purpose of QMS?	improving process
253	which cmd in unix is used to print content of file along the line number	nl f_name
254	the ls-l command displays all the files of a particular directory. How we will identify a block based device file	instead of 'b' if the first letter is '-' or 'd'
255	execute multiple command in unix :-	pipe symbol is used
